

BAP Services

UNDERGROUND UTILITY SPECIALIST

CAPABILITY STATEMENT

COMPANY OVERVIEW

BAP Services, established in 2019 by Brett Pickup, is a leading provider of locating and leak detection services, specialising in the precise identification of underground assets. With over 15 years of professional experience, we offer expert problem-solving and solution-focused approaches for our clients.

Since our establishment, we have earned a reputation for precision and reliability, supported by robust endorsements from our clients. Our dedication to efficiently and accurately resolving complex challenges is at the core of our operations. Committed to excellence in every undertaking, BAP Services continues to be the preferred choice for comprehensive pipe and cable locating and leak detection solutions.

ABN 83 638 159 529

Leveraging over 15 years of experience, we specialise in pipe and cable locating and leak detection, ensuring underground assets are managed with the utmost precision and care.

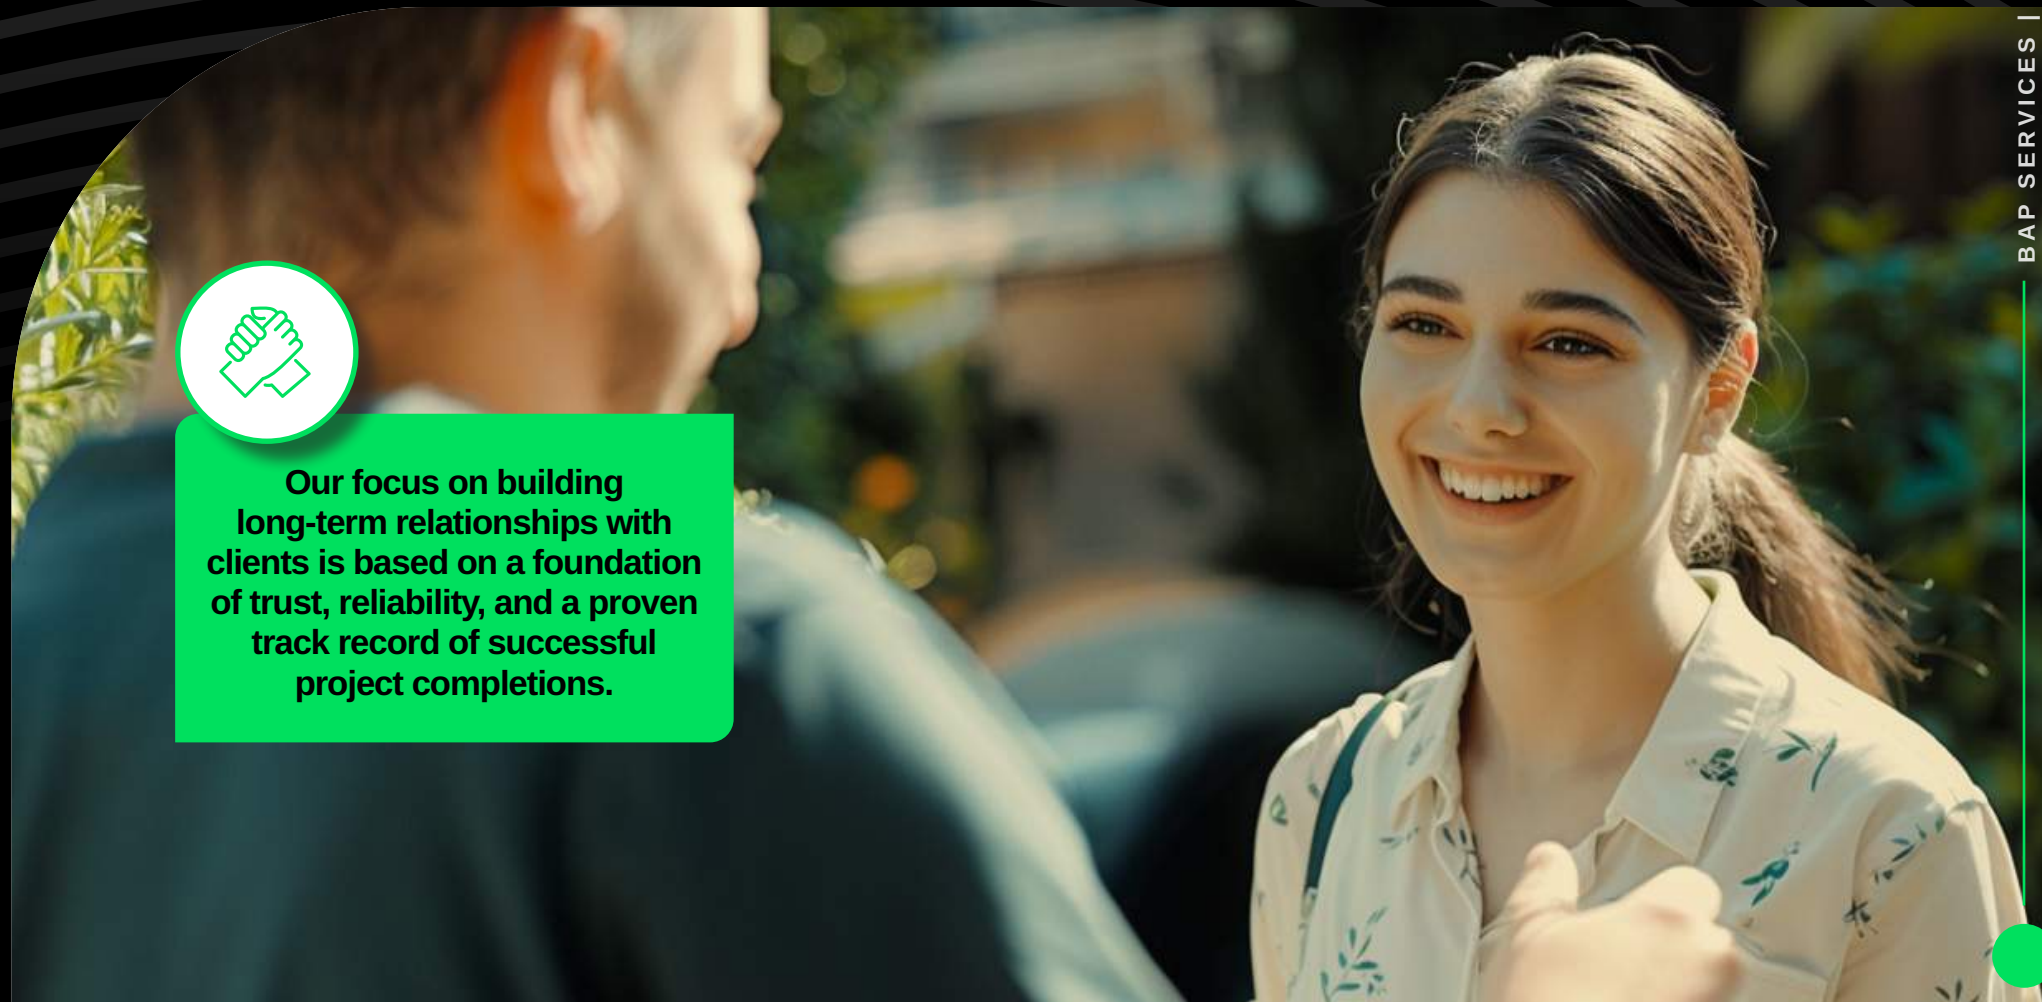

OUR PURPOSE

Dedication to excellence is at the core of our business, reflected in our commitment to delivering quality services with attention to detail in every project.

At BAP Services, our purpose is to offer reliable and efficient solutions in locating and leak detection. We pride ourselves on a problem-solving approach and delivering personalised service to our client base. We are committed to exceeding expectations and establishing ourselves as the trusted, go-to experts in our field.

Our focus on building long-term relationships with clients is based on a foundation of trust, reliability, and a proven track record of successful project completions.

OUR SERVICES

At BAP Services, we offer specialised pipe and cable locating and leak detection services, focusing on the precise identification of underground assets. Our expertise spans more than 15 years, enabling us to provide efficient and accurate solutions. We employ cutting-edge technology and a solution-focused approach to ensure the highest quality results. Our commitment to personalised service sets us apart, making us a trusted partner for clients in need of reliable and thorough locating and leak detection services. With BAP Services, you can expect professional excellence and dedicated support for all your project needs.

PIPE & CABLE LOCATING

Our Pipe & Cable Locating service is adept in a variety of advanced techniques, including Electromagnetic Locator (EML) and Ground Penetrating Radar (GPR), concrete scanning, and utility surveying to accurately pinpoint underground targets. To enhance our precision, we also utilise pulse wave generators, a tool that will create vibrations through pipes that allow operators to locate water filled plastic pipes.

LEAK DETECTION

Our Leak Detection service employs state-of-the-art equipment, acoustic listening techniques, pulse wave generators, and thermal cameras. We use compressed air, CO₂, and tracer gas with precise regulators and gauges to offer a full-service solution. This ensures accurate and efficient leak detection results across various scenarios.

ADDITIONAL SERVICES

Beyond our core offerings, BAP Services provides a wide array of supporting services, including CCTV pipeline inspections, non-destructive digging (NDD), and traffic management for safe work zones. Our expertise also extends to project management, ensuring projects are delivered to a high standard and in a timely manner. We offer pipe cleaning/jetting for maintenance and blockage removal, alongside concrete scanning for structural analysis. Our capabilities in efficient repair solutions are further enhanced by robotic repairs/pipeline rejuvenation, leveraging the latest technology for long-lasting infrastructure improvements. This holistic approach ensures that all your project needs are met with precision and professionalism.

Our approach to problem-solving is rooted in innovation, transforming complex challenges into effective, manageable solutions for our clients.

INDUSTRIES WE SERVE

BAP Services caters to various industries, including construction, utilities, infrastructure, municipal, and residential sectors, providing specialised locating, leak detection, and additional essential services tailored to each industry's unique requirements.
